

Summer Learning – Entering Grades 1st – 6th

New Incoming students for the 2026-2027 school year

While we want our students to enjoy a much-needed break, we also want to keep them from the summer slide and for them to continue exercising their brains. Please see below *optional* summer learning activities for students entering grades 1st – 6th.

| <i>Math</i> | <p>Zearn Summer Intensive Series includes targeted digital lessons that cover the key math concepts that will set students up for success in grade-level math learning this fall. Each lesson takes about 30 minutes to complete. Your child may use this platform to complete online math lessons over the summer to keep up the momentum in math learning!</p> <p>You must have log in information to access. Please email kroccaforte@riversideacademy.com with your child(ren) name and grade to get log in directions with your usernames and passwords.</p> |
| <i>Reading</i> | <p>Summer reading is important! Research shows that kids who read over the summer are better prepared for the coming school year. While not mandatory, we encourage you to have your child participate in a summer reading challenge. Your local parish library often holds a summer reading program.</p> |

We hope that you and your child enjoy some time reading over the summer.

Happy Summer,

Riverside Elementary Staff
